

# Service Agreements

Maximize Equipment Uptime. Minimize Risk.

Cantrell-Gainco Service Agreements provide **planned maintenance, regulatory compliance support, and expert technician training** to ensure your processing equipment performs at peak efficiency.

Our structured service agreements help reduce emergency service calls, improve equipment performance, and ensure compliance with required safety inspections.

With **pre-scheduled visits, trained technicians, and flexible payment options**, Cantrell-Gainco Service Agreements deliver predictable maintenance costs and improved operational reliability.

## Why Choose a Cantrell-Gainco Service Agreement?

### Reduce unexpected equipment downtime

Pre-planned maintenance helps prevent costly breakdowns and emergency service calls.

### Improve machine performance

Routine inspections and adjustments keep your systems operating at optimal performance levels.

### Ensure regulatory compliance

Radiation leakage surveys and safety documentation meet State and Federal compliance requirements.

### Continuous training for plant personnel

Hands-on training during service visits helps staff understand system adjustments and operation.

### Predictable maintenance costs

Flexible payment plans and multi-year agreements allow easier budgeting and planning.

### Improved operational uptime

Regular service visits help maintain equipment performance while minimizing unscheduled downtime.

## How a Service Agreement Works

### 1 Pre-Scheduled Service Visits

Quarterly visits are scheduled in advance to align with plant operations and audits.

### 3 Performance Verification

Machines are validated with QA and production teams to confirm optimal system performance.

### 2 Weekend Service & Training

Our technicians work alongside your maintenance teams to perform inspections, adjustments, and training.

### 4 Detailed Documentation

Service visit reports and recommended spare parts are provided each visit.

## What's Included?

During each service visit, our technicians perform:

- Contaminant detection verification
- Equipment inspection and operational validation
- Documentation and compliance reporting
- Review of parts inventory and recommendations
- Operator and maintenance training

## Eligible Equipment

Service agreements are currently available for:

- X-Ray Inspection Systems
- Wing Segmenter Systems
- YieldPlus® Systems
- Belt Sizers
- Scale Systems
- Vacuum Transport Systems
- Metal Detectors

## Service Agreement Levels

Level	Description
■ Basic	■ Quarterly audit and compliance validation performed during scheduled weekday visits.
■ Intermediate	■ Basic + Weekend evaluation and training with operational adjustments and safety surveys.
■ Premium	■ Intermediate + Full system evaluation with training, safety validation, tank and detector replacement, 15% labor discount on service calls, and expedited emergency service scheduling. 2- or 3-year options available.

## Protect Your Investment

Cantrell-Gainco Service Agreements help processors maintain **peak equipment performance, compliance readiness, and operational reliability.**
